## 🔧 Projects

○	<b>Water and Soft Drinks Supplier's</b>
	In this project we have created a online website which help the user to order the water and soft drinks online.User can easily order it.After the user order the products it is visible in our side.This system also generate the bill which the user have ordered the product.It is generated automatically. Through this project i learn how develop the responsive websites

A vertical line with two small circles at the top and bottom, serving as a decorative element for the list items.

### **College Website**

In this project we have created our college website. It overcome the problem of current website. We have made the website more responsive and attractive then the current one.

### **Calculator**

It performs all the arithmetic operation such as addition, subtraction, multiplication and division. Through this project i have learned how to develop calculator using different languages.
